Action taken on the basis of analysis of the Feedback for the session 2020-2021

Feedback was collected from Students, Teachers, Alumni and Employer and was analysed with the help of pie chart. The analysis on the feedback received from the various stakeholders helped us in identifying the gap in the syllabus and the areas the College needs to work upon. These were discussed in details in IQAC and the following actions taken:

- The total response of 465 **students** were compiled and analysed by the IQAC. After thorough analysis IQAC pointed out some weakness on the part of the institution and took proper remedial measures:
 - i) Students showed a little dissatisfaction about the cleanliness of the college and for this we took proper measures to monitor the cleaning of the campus regularly and provide clean drinking water facility in the college.
 - ii) Students need more attention for their career counselling in the college and for this more career oriented lectures are being organized with a focus to help students understand one's own self, as well as the career options available in the home and other Institutes suiting their interests, so that one can take an informed decision about career and education. IQAC also recommends the college to open Placement Cell to look after the issue separately.
- The total response of 57 **teachers** were collected, compiled and analysed by the IQAC. As the College is affiliated to the University of Calcutta, it strictly adheres to the syllabus of the home University, having no scope for restructuring of the syllabus. However since few faculty members belonging to different departments are members of the Board of Studies, suggestions related to the framing of syllabus of various Courses were communicated to the Chairmen of different Boards of the University through BOS members for the proper redressal of suggestions. Teachers showed a little dissatisfaction about the ICT facilities of the college and thus IQAC recommend to take initiatives to improve on the ICT facilities, converting class rooms into smart class rooms with the portable ICT tools, dedicated smart class rooms and state of the art and upgraded laboratories. To increase on-campus online activity, the existing Wi-fi connectivity is needed to be upgraded by setting up several points through strategically placed routers.
- It is observed from the actual responses of the Alumni that they are primarily satisfied with the quality awareness of the Institution.
- From the Employers feedback analysis we can see that they focussed on making the curriculum more appropriate for the application of what the students are learning.
